

# Training and Education for RDM in Denmark

# National projects and local activities

- Data Management in Practice (DMIP)
- National Forum for Research Data Management (DM Forum)
- Partners:
  - Universities and the National State Archives
  - Denmark's Electronic Research Library (DEFF)
  - Danish e-Infrastructure Cooperation (DeIC)

# DMIP: Cases and Themes

# Data management Cases

## The State and University Library

- Cases and activities on each participating institution as part of the DMIP project - overview
- The cases of The State and University Library:
  - LARM
  - Probing a Nation's Web Domain

# Training activities in relation to cases

- In both cases researchers were introduced to a Data Management Plan related to use of the library's data. Staff members assisted the researchers to complete the plan
- The experiences will be used to develop a local version of a DMP-plan and future support in DM

# Train the Trainer

- Course organized by Aalborg University Library
- Part of DMIP and DM Forum activities
- Presentation of Essentials 4 Data Support and other services

# Other activities

- Activities at all the involved institutions
  - Technical University of Denmark (DTU) has established an department handling Data Management
  - University of Southern Denmark (SDU) has established a local version of the DM forum and are deeply involved in activities regarding medical data (OPEN)
  - + more.....

# Experiences so far

- Library and University staff must be trained
- Services must be developed in close cooperation with researchers
- The different tutorial materials must have cases from Denmark
- The services must be discipline specific
- The services must be integrated within the services of Ph.D.-schools and other agencies helping researchers with applications and funding
- Review of the project in 2017
