

ELDORADO

SALES

LIBRARIES CAN OFFER:

- e-book reader (e-pub, image-based reader)
- download options (DRM free, DRM protected, e-circulation)
- reader request-based digitization (free copy / paid copy)
- search function (basic, advanced)

The main goals of ELDORADO are to enable access to the digital holdings of any library consortium and to create a cultural eco-system of libraries, readers and publishers while contributing to **research** and **education**.

The system provides **collaborative** digitization **workflows** together with the management of copyright and digitization status. It offers remote access to public domain documents, orphan works and standard copyrighted documents, as well.

Furthermore, it enables digital access to out-of-print **copyrighted** books, and **on-demand** user requests are given priority during the **digitization** process.

DIGITIZATION

digital content providers

- libraries
- publishers
- others

external service providers

metadata providers

FINANCES

calculating digitization fees

- digitization time
